“Fundamentals of Concrete Floors”

- **WHEN**: March 17, 2010; 9am to 4 pm
- **WHERE**: NC State University, Biltmore Hall, Room 2221
- **REGISTRATION**: Deadline is March 5, 2010
  - $210/per student
- **FACULTY**: Dr. Michael Leming
  Dr. Leming is a Fellow of the American Concrete Institute (ACI) and has over 35 years of experience in concrete materials engineering. Before joining NCSU, Dr. Leming worked with a large concrete conglomerate offering a wide variety of concrete related products and services. His areas of expertise include concrete mixture development and optimization; design, construction, and troubleshooting of concrete pavements and floors; pervious concrete; destructive, semi-destructive, and non-destructive testing of concrete; condition assessment of concrete and repair and rehabilitation.
- **TOPIC**: “Fundamentals of Concrete Floors”
  Dr. Leming will present a general overview of fundamental, and practical, concepts concerning concrete floor design, construction, troubleshooting, testing, and performance; focus will be given to issues relevant to floor coverings and installation.
